

ABSTRACT

A roof liner includes a core layer, a reinforcement layer arranged on at least one side of the core layer, and a decorative layer facing a passenger compartment.

- 5 The reinforcement layer is formed from at least one plastic matrix and fibres. The core layer is formed from a foam material. The foam material and the plastic matrix present at least one polyolefin. The polyolefin of the foam material is polypropylene and the fibres are arranged non-directionally in the plastic matrix.
